

experience

- Member of Technical Staff - ai neolab

July 2026 - Present
- Founder - Nomos

November 2022 - July 2026

Enterprise-scale RLHF and benchmarking platform for large language models (LLMs) and applied AI teams; raised another \$6mm and built another team of top-tier engineers.
- Founder - Vira

October 2021 - June 2022

AI underwriting and financial services for online businesses and creators; raised \$6mm and built a team of top-tier engineers.
- Founding Software Engineer - Neeva

June 2019 - October 2021

AI search engine, founding/pre-product hire; MLOps, NLP, data engineering, backend engineering, and infrastructure. Acquired by Snowflake.
- Founding Software Engineer - Chan Zuckerberg Initiative

March 2018 - June 2019

AI for political campaigns, founding engineer on policy team; ML and data infrastructure for Summit Learning; MLOps, data engineering, and backend engineering.
- Early Software Engineer - Plaid

January 2017 - March 2018

Early engineer who scaled financial institution connections from 40 to over 4,000; won a few hackathons; backend engineering, API engineering, developer experience, and infrastructure.
- Software Engineering Intern - Tinder

September 2016 - January 2017

Backend team; developer experience, backend engineering, and infrastructure.
- Software Engineering Intern - Facebook / Meta

June 2016 - September 2016

Privacy team; privacy engineering, developer tools, and backend engineering.
- Software Engineering Intern - Arista Networks

June 2015 - September 2015

education

- Computer Science & Computer Engineering - University of California, Irvine

Bachelor of Science

skills

C++, Go, Rust	Applied AI & LLMs	Distributed Systems	Engineering Leadership
Web Scalability	Python, TypeScript	Reverse Engineering	Systems & Networking
Search Engines	Machine Learning	Financial Technology	Search Algorithms & Infra
Web Scraping	Operating Systems	AWS, GCP, Cloudflare	Serverless Infrastructure
